Introducing the ultimate WM Sport Jaguar XK120 Roadster

We are delighted to introduce the latest Car in our 'WM Sport' Series... the Limited Edition Jaguar XK120 'WM Sport' Roadster. Built with the exacting standards and impeccable craftsmanship for which Woodham Mortimer are world renowned!

With its swooping side profile, long bonnet and signature bug-eyed headlamps, the XK120's styling is a masterclass in post-war car design. Lauded for its rakish good looks, the XK120 was initially built by Jaguar as a testbed to showcase the new XK engine at the 1948 London Motor Show. However the response at the Show from the public and the media alike, was such that William Lyons, founder of Jaguar, put the XK120 into build immediately.

The XK120 has become legendary, a true British work of art and our aim, at Woodham Mortimer was to combine the iconic beauty and 1950's classic styling of the XK120, with today's technological advances and modern road/racing requirements.

Hand-built and fully restored at our Workshops in Chelmsford, this Limited Edition XK120 took in excess of 2500 working hours to fully restore and build by our highly skilled technicians. Available in both left and right hand drive, we are building a limited total of 6 Cars to our 'Mille Miglia Specification' this year, available in Jaguar Red or Midnight black

Equally well equipped for Road and Race use, the Engine has been fully rebuilt, fine-tuned and improved using exclusive and proven WM Parts, and achieves approx. 190bhp. Our in-house Paint Shop produce world-class work, evident here with a total of 7 layers of paint protection, giving the ultimate finish.

We have a hard earned reputation worldwide for the quality of our restorations and the XK120 WM Sport is a fantastic example of the care and attention put into our builds. The result certainly speak for itself.

Our long term relationship as the Global Restoration Partner of the historic Mille Miglia gives us an undoubted insight of what's needed to produce the finest quality Classic Car – equally capable of everyday driving as well as competing in the most demanding event
